

# BOLIVIA<sup>lvc</sup>

## Low vicine/convicine quality with best protein yield.

### Benefits

- ✓ High yield potential & high protein content → above-average protein yield.
- ✓ Low vicine/convicine content ideally suited for animal feeding (especially poultry) but also interesting for human consumption.
- ✓ Low TGW.
- ✓ Early flowering and mid-early maturity, compact type.

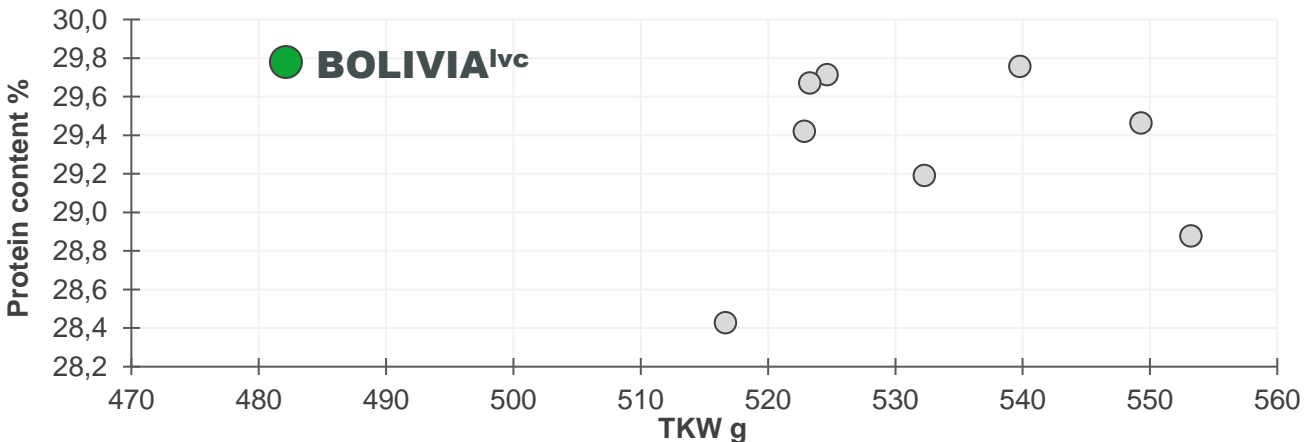

- 6 Grain Yield
- 7 Protein Yield
- 8 Standability

Classification based on German Federal Plant Variety Office 2023 and own observations.

## Low TGW with high protein content.

The small grain size of BOLIVIA<sup>lvc</sup> reduces sowing costs and makes it easy to handle. In addition its high protein content makes BOLIVIA<sup>lvc</sup> very suitable for human consumption and animal feeding.
