

# FUTURA<sup>lvc</sup>

## The future is now.

### Benefits

- ✓ High to very high protein yield.
- ✓ Significantly reduced vicine/convicine content enables higher proportions in the feed ration of poultry and pigs and also makes FUTURA<sup>lvc</sup> attractive for human consumption.
- ✓ Longer plant type with higher set pods ensures low-loss harvesting.
- ✓ Certified-seed is expected to be available for sowing 2025.

Classification based on German Federal Plant Variety Office 2023 and own observations.

## FUTURA<sup>lvc</sup> – the result of 40 years of breeding progress.

FUTURA<sup>lvc</sup> transfers the breeding progress of the last decades into practice and delivers excellent protein yields for trough and plate.
