

# LYNX

## Healthy yields for field bean growers.

### Benefits

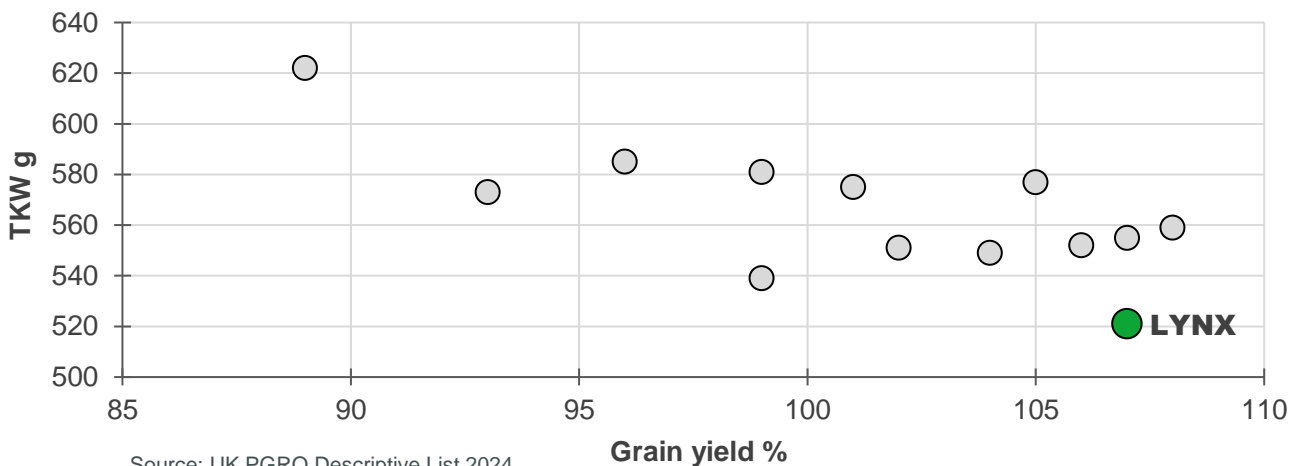

- ✓ High grain and protein yield potential, with easy to handle TKW.
- ✓ Very high resistance to downy mildew (Peronospora).
- ✓ Very high standability at harvest.

Classification based on German Federal Plant Variety Office 2023 and own observations.

### Small seeds with high yield.

The slightly smaller seed size makes LYNX very easy to handle with conventional sowing technology while the high standing power ensures low loss and easy harvesting.
