

# VICTUS<sup>lvc</sup>

## Compact growth with reliable yields.

### Benefits

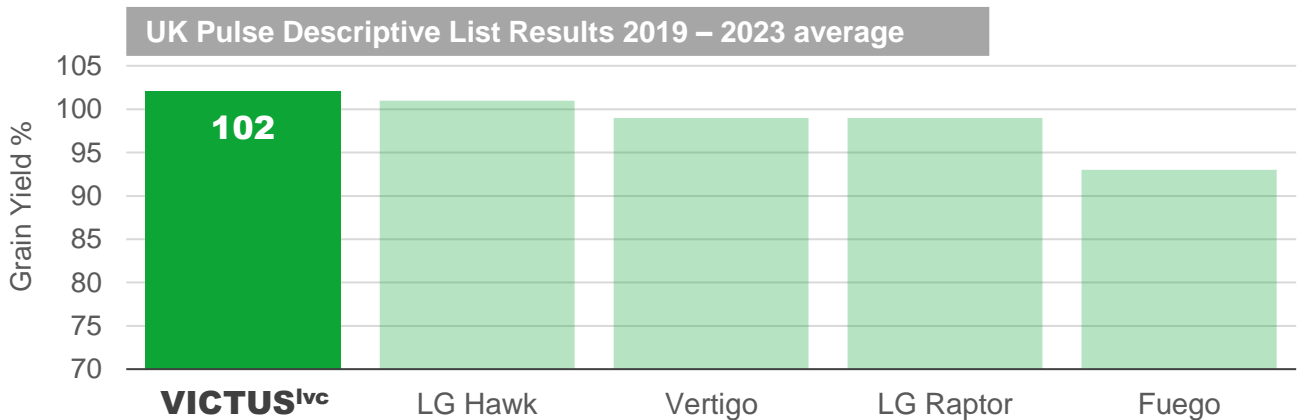

- ✓ Site-adapted good yield potential with favorable agronomy characteristics.
- ✓ Compact growth type with high lodging resistance.
- ✓ Low vicine/convicine quality is well suited for animal feed and human nutrition.
- ✓ Rapid youth development and earlier maturity compared to other varieties.

*Classification based on PGRO descriptive list 2023 and own observations.*

## Popular and successful in the largest field bean market in Europe.

VICTUS<sup>lvc</sup> is characterized by its universal suitability for animal feed and human nutrition. Grain and protein yields are on a similar level as conventional vicine-containing varieties.
